

**June updates 2010**

**Please note:** The guidelines include the read codes required for the service along with the Escro data collection screens, which can now be launched from within the guideline using the button at the top of each enhanced service. We are aware that the screens **will not** 'refresh' the information until the guideline is closed and re-opened, and this may cause confusion, so for this reason, we have included the option of recording the read codes using the guideline.

**Please see page 2 for sub documents to be replaced.**

Version	ES Service	Read Term/s	Read Code	Change Made
2.03	Alcohol BI	N/A	N/A	Guideline sections separated (best practice now has its own section)
